TECHNICAL SKILLS

React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, State Management

Node.js, Express.js, MongoDB (Growing), REST APIs, Async/Await, Git, Vite

PROJECTS

AniScope - Live Anime Discovery Platform

- Fetches real-time anime metadata from Jikan API, demonstrating async queries.
- Implemented dynamic search queries with debouncing and state caching.

GitHub Finder - Profile Scan Tool

- Pulls GitHub repository, follower, and public activity metrics in real-time.
- Structured fallback UI boundaries to handle GitHub API limit thresholds.

Gallery of Senses - Creative Visual Exhibit

- Developed device-independent frame-rate interpolation using Canvas API.
- Managed easing transitions and particles to create responsive fluid motion.

EDUCATION

Bachelor of Science / Computer Science | India
